CONTENTS

NOTE.—This book is made up of separate parts, or sections, as indicated by their titles, and the page numbers of each usually begin with 1. In this list of contents the titles of the parts are given in the order in which they appear in the book, and under each title is a full synopsis of the subjects treated.

INORGANIC CHEMISTRY, PART 1

	<i>Pages</i>
Chemical Theory, Definitions, and Laws.....	1-59
General Introduction	1- 4
History of chemistry; Priestley and the discovery of oxygen; Scheele and his discoveries; Cavendish and the fixation of nitrogen; Lavoisier and the phlogiston theory; Dalton and the atomic hypothesis; Berzelius and analytical chemistry; Liebig and public laboratories; The discovery of Wöhler; Recent progress in chemistry.	
Composition and Division of Matter.....	5-10
Matter; Properties of matter; Substances; Chemical and physical changes; Physics and chemistry; Organic and inorganic chemistry; Mass; Divisions of matter; Hypothesis defined; Molecules and atoms; Difference between chemical and physical changes; Electrons.	
Elements and Their Combinations.....	11-18
Elements and compounds; Atomicities of molecules; Symbols and formulas; Forms of matter; Physical condition of chemical elements; Mechanical mixtures and chemical compounds.	
Atomic and Molecular Weights.....	19-25
Chemical Affinity and Valence.....	26-30
Chemical Equations and Their Interpretation.....	30-37
Conservation and Transformation of Matter.....	38-40
Indestructibility of matter; Conservation of energy; Chemical energy; Exothermic and endothermic reactions.	
Laws of Chemical Action.....	41-42
Law of definite proportions; Law of multiple proportions.	
Names of Chemical Compounds.....	43-59
Acids, bases, and salts; Acid salts, basic acids, and acid bases; Compounds containing two elements; Nomenclature of acids and salts belonging to one series.	

INORGANIC CHEMISTRY, PART 2

	<i>Pages</i>
Chemical Theory—(Continued).....	1-19
Methods and Units of Measurement.....	1- 6
Metric weights and measures; Measurement of temperature; Measurement of pressures.	
Properties of Gases.....	7- 8
Kinetic Theory of Gases.....	9
Diffusion	10-14
Diffusion of solids, liquids, and gases; Effect of heat on the volume of a gas; Effect of pressure on the volume of a gas.	
Volume Relations of Gaseous Molecules.....	15-19
Solutions and Their Ionization.....	20-30
Solutions	20-24
Ionization	25-30
Conductors; Electrolysis; Theory of ionization; Ionization of acids; Ionization and bases; Ionization and salts; Extent of ionization; Source of electric charges.	
Physical Processes	31-53
Apparatus and Methods.....	31-49
Principal types of apparatus; Methods of separation.	
Practical Hints	50-53
Heating glass; Bending and drawing glass tubing; Cutting glass tubing; Rounding the ends of glass tubing.	

INORGANIC CHEMISTRY, PART 3

Chemical Calculations	1-41
Proportion, Percentage, and Calculations of Quantities	1-23
Importance of chemical calculations; Proportion; Percentage calculations; Calculating quantities of constituents.	
Relation of Specific Gravity and Degrees Baumé....	24-32
Crystallography	33-35
Periodic System	36-41
